---

Teresa,

I have another stormwater question I was hoping you could help us out on. Upon further review of the site, I'm starting to wonder if the low lying area on the proposed Equipment Depot property is actually a stormwater control facility. I've highlighted a PDF showing the general location. Do you have any records of this being area being designed/designated as a stormwater facility? If so would it be possible to get the approved design plans etc for this area?

If you could let us know as soon as possible we would greatly appreciate it.

Lastly, I also wanted to follow up on the email I sent yesterday. If you could let me know your thoughts it would be appreciated.

Thanks in advance.
