Kelly,

Good Afternoon! West Chester Fire Department has informed me that the area in the complex will have to have multiple street names due to the layout of the buildings. The fire dept. will also be requesting a more detailed drawing showing the radius of the turnaround areas, road widths etc... If you have any questions you can give them a call at 513-777-1133 and they can help answer any further questions. Once the plans have been approved by the fire dept for the street information, we can figure out street names and addressing from that point.

Thanks,
Angie McIntosh

Hi Angie,

Good morning! I understand that there are not enough numbers on “West Chester Road” for our site, but because our site is technically on West Chester Road, I would really like propose that “West Chester Circle” be used for all numbering, if not currently used of course. For locating purposes we have found that it is always best to use a version of the street name we are located on or are near to allow our residents and guests to locate us.

Thank you,

Kelly Koenig

Good Morning,

It is to my understanding that you have spoken with Scott Halsey on the addressing for this area. The street name of West Chester can't be used. There are multiple names for that road in that area already. It would confuse everyone's addressing with the post office and would force us to change the road name after all of the units themselves have adjusted to the original road name. If you would like to pick a few names out and email us back we can tell you which ones work.

Thanks,
Angie McIntosh

Chris,

Good afternoon. Thanks for looking into this. As I mentioned, we are working with West Chester Township on to develop a multifamily apartment community. The development was assigned the address of 5623 West Chester Road, West Chester, OH 45069. I wanted to confirm that this would be the address for the site and all units, and that our preferred numbering will be acceptable. I have attached our site plan and preferred unit setup, along with floor plans that reflect the numbering.

Let me know if you have any questions.

Thank you,

Kelly Koenig
