Hi Eric,

Thank you so much for sending the drawings. I have printed copies to take to Tim Dawson today, as well as electronic version. Once we go over everything, I'll get the information and your contact information over to VCA's team.

Thanks again for your help. I look forward to working with you.

Mindy

[EXTERNAL]

Mindy,

Received your message yesterday afternoon. I've got several appointments today and wasn't sure if we would be able to connect. Attached are several documents we have on file for your facility. Hopefully, these will help facilitate discussions with Tim Dawson.

I'll be your point of contact at the County Engineer's Office and will review the site civil drawings, specifically grading, sediment & erosion control, and stormwater management.
