Good afternoon again,

As we discussed a moment ago. I did go out to the property mentioned this morning. The existing shared driveway has sight distance of top of cars only about 115' East. 35' west of existing driveway cars disappear completely approximately 150' East. Any further west the new access would only get worse.

I would love the opportunity to learn more about access management and the process you mentioned a moment ago. Whether it be tag along on a site inspection/evaluation or just a quick run through. I am in the process of taking the ODOT online access management course but would love any further learning tools.

Please let me know if I can be of any further assistance.
